HOW DO I READ THIS TABLE?

- In 2016-17, *direct* tourism GRP in Tropical North Queensland was worth \$1.7 billion (▼ 1.1% compared to 2015-16). This was 10.8% of the region's total GRP.
- Indirect* tourism GRP was worth an extra \$1.1 billion to the Tropical North Queensland economy
- So, in 2016-17, tourism (both direct and indirect) was worth \$2.8 billion to the Tropical North Queensland economy.**

What is **tourism consumption**?

- The total value of goods and services consumed by domestic and international visitors in Australia

What is **direct contribution**?

- Money spent directly in the tourism industry – with no tourism industry this money wouldn't be generated, or these people wouldn't be employed.

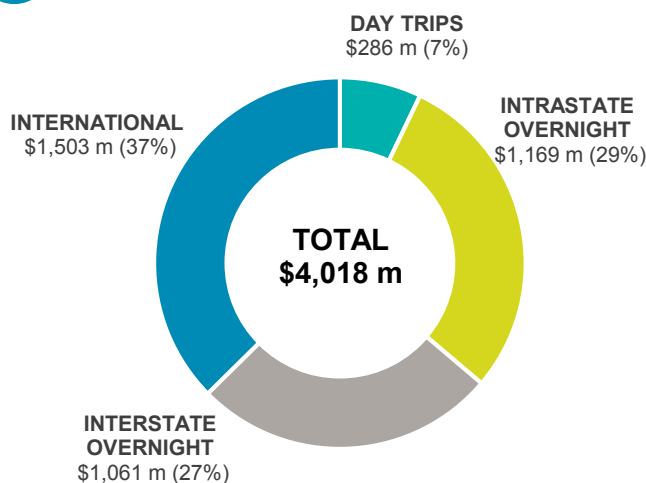

What is **indirect contribution**?

- The flow-on effect of the tourism industry. In Tropical North Queensland, every dollar spent in the tourism industry, created additional value elsewhere in the economy.

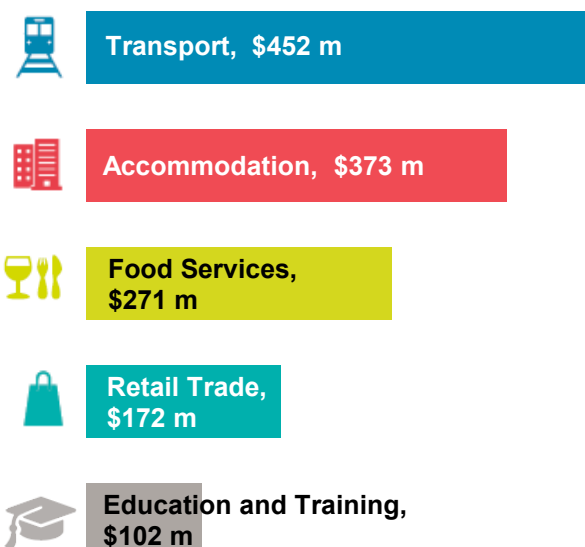

Why do we use **GVA**?

- GVA allows easier comparisons across industries. GVA is equal to GRP minus taxes.

SHARE OF REGIONAL CONSUMPTION

INDUSTRY SHARE OF DIRECT TOURISM GVA

TOURISM'S DIRECT CONTRIBUTION TO EMPLOYMENT
